

Tips and Tricks

How to use read!t even better

ACTIVATE VPN

In order to be able to access online resources of the WU library, the [VPN client \(Global Protect\)](#) must be activated.

CREATE NOTES

You can add short **private notes** to each resource and put important thoughts in the right place. These notes are only visible for you!

DIGITIZATION REQUEST

With the **digitization request** tag, you can send a request to our library team, if a desired resource can be digitized page by page or chapter by chapter. If this is possible, we will make the scan available via a link directly on your read!t-list.

EXPORT LIST

Export selected lists to a Word document, a PDF file or in a RIS format. Then you can also print it out, send it, share it or use it in your [reference management program](#).

MY COLLECTION

Build your own collection of literature and resources. [My Collection](#) is the ideal collection space for interesting and helpful resources – for future courses, research projects or for other purposes.
