

Tips and Tricks

How to use readit even better

LOGIN READIT

You have access to readit! via the desired course in the Syllabus or via the central portal at <https://readit.wu.ac.at>. Simply log in with your WU account and off you go!

ACTIVATE VPN

In order to be able to access e-books, e-journals, e-articles and many databases in the WU library, the [VPN client \(Global Protect\)](#) must be activated.

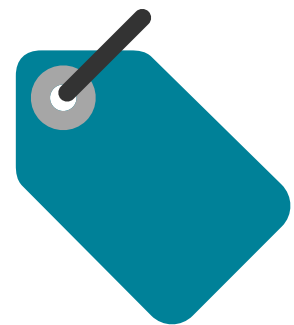

MARKING LITERATURE

Keep track of the literature you have already read or edited and **mark it as read!**

ASSIGN TAGS

Just mark your favorite literature with **tags**. They will help you to organize the reading list more clearly. This feature is also available in [My Collection](#), where you can collect any resources you like on your own list.

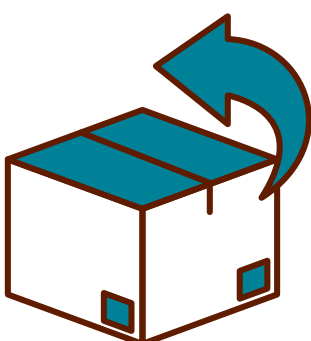

CREATE NOTES

You can add short **private notes** to each resource and put important thoughts in the right place.

COLLECT LITERATURE

Build your own collection of literature and resources. [My Collection](#) is the ideal collection space for interesting and helpful resources - not just for studying!

EXPORT LIST

Export selected lists to a Word document, a PDF file or in a RIS format so that you can also print it out, send it, share it or use it in your [reference management program](#).
